5	Inhalt	This course combines the perspectives of the ethics of competitive markets, business ethics, and corporate social responsibility. First, we address the question of how social and environmental objectives are met at a macro-level. Here, we place particular emphasis on national and supranational governance structures. In a second step, we take on the perspective of the individual firm by raising the question as to if and to what extent firms need to incorporate moral issues into their value creation processes. Against this background, corporate social responsibility may serve as a means of implementing these moral issues. Thus, we take a closer look at CSR, its origins, development, and tools.
