### Frage text

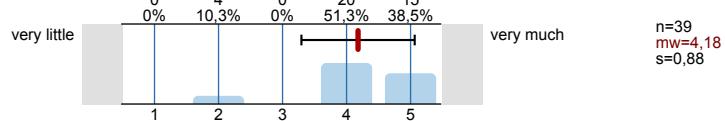

## 1. Global Lecture Assessment

### 1.1) What grade do you assign the lecture in general?

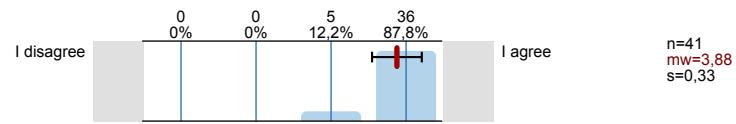

### 1.2) I learned in the lecture

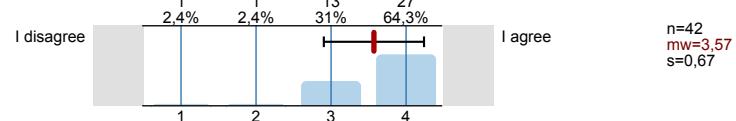

## 2. Planning and Presentation

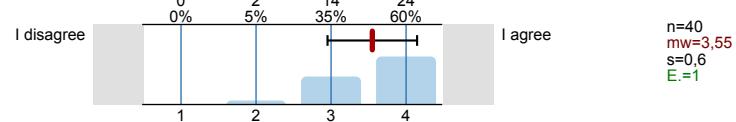

### 2.1) I was able to follow the lecture in the English language well

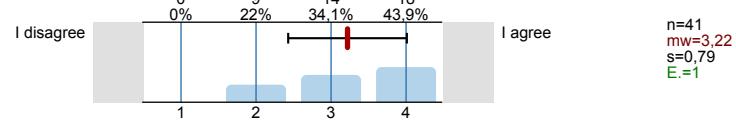

### 2.2) The lecture is structured clearly

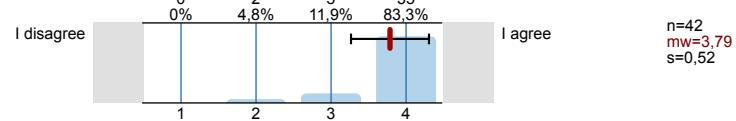

### 2.3) The content is aligned with clearly defined learning objectives

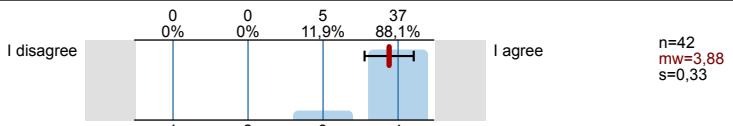

### 2.4) Other lectures are put in context

### 2.5) The lecturer's inputs and explanations are easy to follow and to understand

- 2.6) The teaching materials used during the lecture (e.g. slides, scripts, StudOn) help to understand the content better

- 2.7) The content-related previous know-how of the students participating in the lecture differ. How could the lecturer better deal with this problem?

He did a good job of providing "catch up" lectures, via YouTube.

- the video slides that were provided help very good to deal with this problem
  - if time allows, it would be good, if the people, who ~~haven't~~ have more background information can share during the lecture
- you did a great job! ☺

You cannot ~~as~~ there is only one test at the end.  
it is unfair to give the students who have not  
attend a previous course extra work.  
⇒ Maybe you could focus on different areas in the  
different lectures.

I think he is handing I very well. Especially the uploaded  
videos show that

It's done well.

good solved with extra material / videos

He is trying to deal with this problem through extra / additional stuff too much

Give those students who didn't participate in the Bachelor Module additional literature / slides, so they can prepare them beforehand, and the course can continue at an advanced level

He does it very well to bring everyone to the same level.

- videos like standards & norms

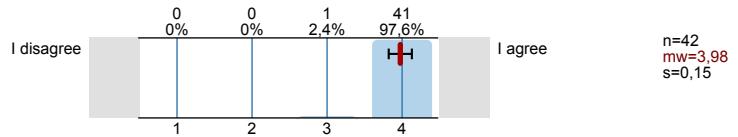

it's handled very ~~go~~ well

I think pre-recording video is a great idea to learn parallel to the main lecture, and most helpful for exam preparation

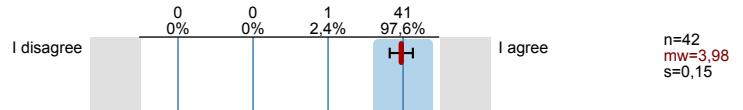

this problem occurred but the professor managed it well providing material online for those who did not have the previous background.

### 3. Interaction with Students

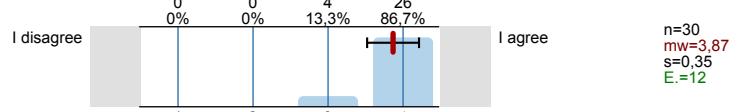

- 3.1) The lecturer is friendly and open-minded towards his students

- 3.2) The lecturer motivates to ask questions and responds to them in detail

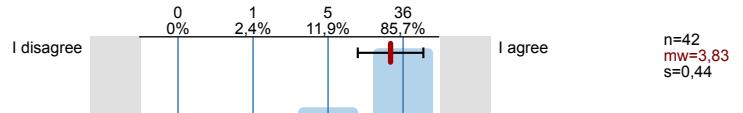

- 3.3) The students are supported well outside of the lecture (personally, electronically)

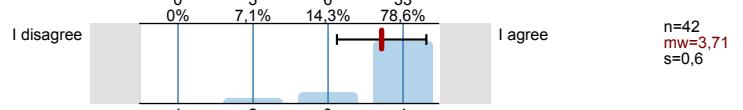

#### 4. Interest and Relevance

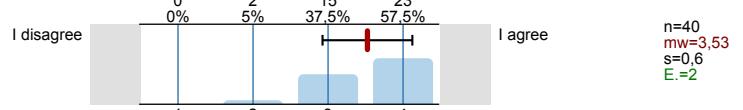

- 4.1) The lecture is interesting

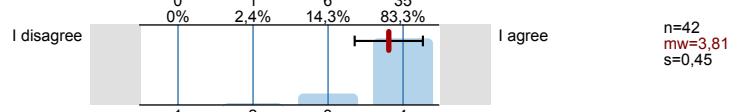

- 4.2) The lecturer illustrates what the lecture is good for

- 4.3) The research context is considered (methods, developments, projects, results)

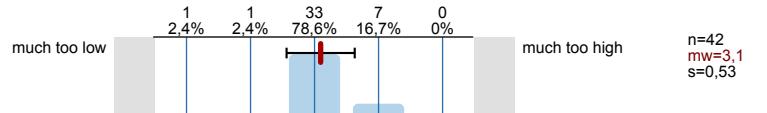

- 4.4) The lecturer links theory and practice (examples, guest lectures, etc.)

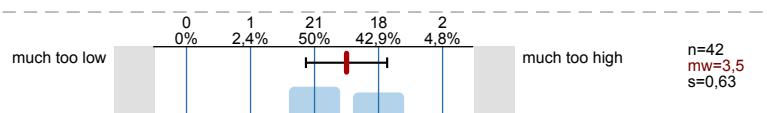

#### 5. Challenge and Scope

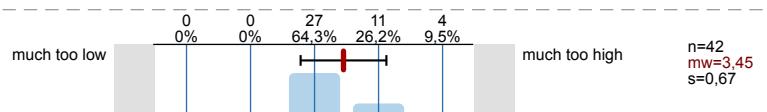

- 5.1) The degree of difficulty of the lecture is

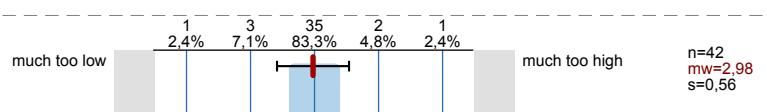

- 5.2) The scope of lecture contents is

- 5.3) The lecture speed is

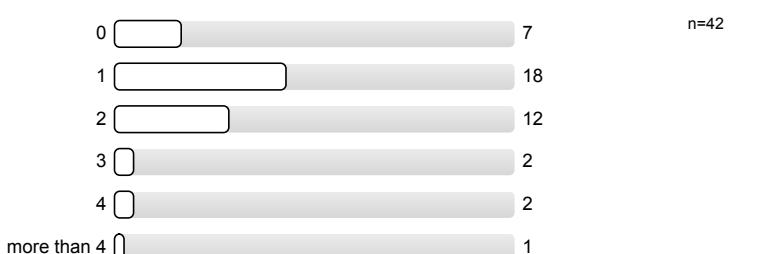

- 5.4) The previous knowledge expected in the lecture is

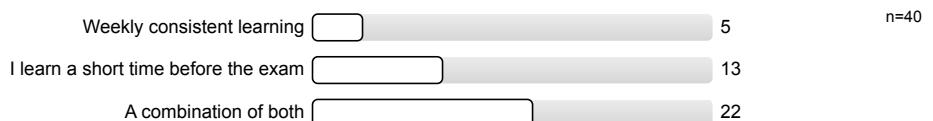

#### 6. Self-study

- 6.1) How much time did you spend for self-study for this lecture until now? Please specify in hours per week on average.

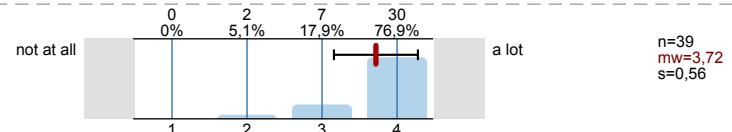

## 7. Socio-demographic Data and Background Variables

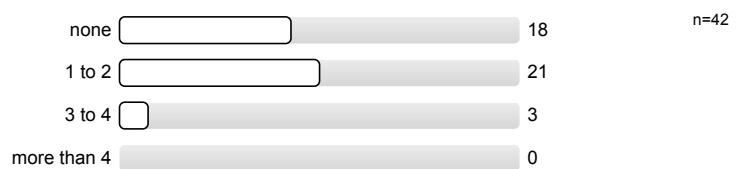

7.1) What learning style do you prefer?

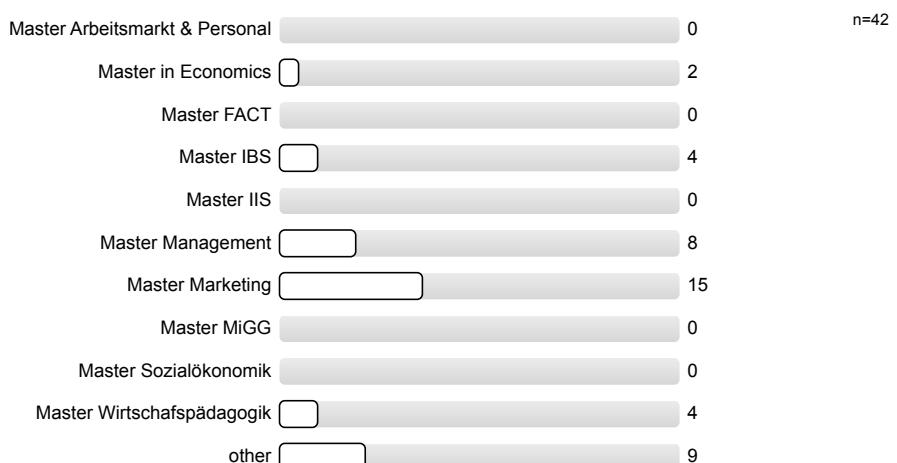

7.2) The lecture's subject is interesting

7.3) How many lectures did you miss?

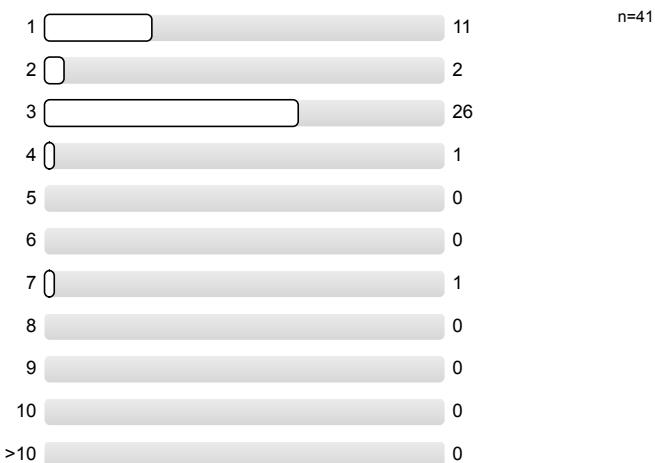

7.4) Please state your programme of study

7.5) I attended the lecture for the following reason:

- 7.6) For how many semesters (including the current semester) have you been participating in your study programme?

## 8. Final Questions

- 8.1) What do you particularly like about the lecture?

Energetic and passionate lecture. Nice that it is recorded. Input from students is considered to determine course focus.

- Many topics are considered, student opinion is considered
- Professor is open & explains with many examples to make things clear
- It is recorded - guest speaker to bring in practical aspects
- Extra video ~~for free~~ interesting - after each line - easy to follow
- good slides
- understandable & clear English
- friendly & knowledgeable prof
- that it is in English. A very nice English.

I like the mix of traditional lecturing, live-voting, homework and reading assignments and discussion in class.

Very engaged Prof! I can see how he likes the topic and this influences me (positively), too

very interesting, lots of participation / inclusion, very current

the content as such  
+ practical examples

Man merkt, dass Prof. Dr. Beckmann den Stoff sehr gerne vermittelt und das ~~ber~~ macht die Vorlesung interessant, spannend und auch authentisch.

Very interesting to listen lecturer

That the lecturer really cares about what students are interested in

The lecture is openminded towards students and for example give the opportunity to share ideas, discuss with others ....

Prof. Beckmann is very friendly and always does his best in supporting the students.

Very kind teacher. Always there for students

The lecturer is very motivated and open to questions,

Prof. Beckmann is one of the friendliest Prof. ever.

I like that at an economics university is at least one lecture that addresses sustainability! (or at least one chair that offers them)

- very interesting lecture
- audio recordings are very helpful
- great lecturer, brings topic across very well

Videos are great!   
Lecturer's motivation, topic, interaction, structure  
Students' inclusion in the choice of topics/focus of the lecture

use of Menti, discussions, interesting topics

Very interactive  
Teacher speaking style is easy to follow

## The teaching style

- lecture style (structure and content)
- support outside lecture (updates, materials)

I like new contents that the lecturer provide

- the lecturer's teaching style is amazing!
- topics are relevant + interesting

the subjects are broad enough to be reviewed academically, yet we also go into specifics with examples and cases.

## Teaching method and support material

The lecturer is great and have an amazing passion for his subject! Have chosen the lecture only because of the lecturer! ☺

I like the videos, interactivity (menti etc.) and the lecturer.

Very easy to follow. Prof. Beckmann makes the lectures entertaining.

---

8.2) What is bad about the lecture? Why?

Sometimes slides are hard to follow when completing revision questions -

- sometimes too fast (which is not ~~weser~~ necessarily the fault of the professor since there is not much time)  
xx

a bit too fast

time management of the lecturer could be  
a little better → finish 1 topic in 1 session

many required reading after lecture.

Too much additionally stuff on StudOn. YouTube Videos of lecture.  
If it is not possible to complete all scripts within the lecture,  
skip it and leave it out. This is way too much stuff. Please  
go in deeper and not broader.

Some information collide with the Bachelor-module,  
so it is sometimes a repetition. But the lecturer  
tries to make it interesting for both groups, which is good.

Sometimes the slides seem a bit unstructured or better hard to  
understand (without further explanation).

→ speed is too high sometimes, slides are gone through  
too quickly

Too much Bachelor content. Maybe one lecture as first sustainability lecture and  
another as advanced one after Natta and/or SUSTIC is possible.

speed is too high, too much self-study outside the lecture (videos,  
readings, etc.)

Different Media and Homework make it difficult to follow

Too much content in less time

- sometimes lectures end after official ending: time pressure for students who have to go to other locations (Large Grade) in order to participate other lectures afterwards

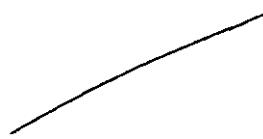

It's a bit too much

so far, all fine

- 
- 8.3) What are your suggestions for improvement? What could be implemented from other lectures?

This is one of my favorite lectures.

- \* It would be good, if there will be a hint what is important for the exam since many topics ~~were~~ were covered.

- Could you please sign slides with "Exkurs" when they are for the understanding but not asked for in the final test.

Keep going!

An upload date to the lecture slides would be helpful or if it's possible, all slides at the beginning of the semester.

See above → time management

Todo bueno ☺ Maybe more discussions could be interesting → read article for homework & discuss about it in the following lecture

If a lecture can't be held because Prof. Beckmann has another appointment, I would prefer him cutting down lecture content instead of letting us watch additional videos on our own at home.

fewer required readings for class, more discussions

A list of all required reading and videos and to which lecture they belong

less content & more depth

the additional lecture / slides to keep up with new content.  
Maybe to also receive the slides with a bit more anticipation

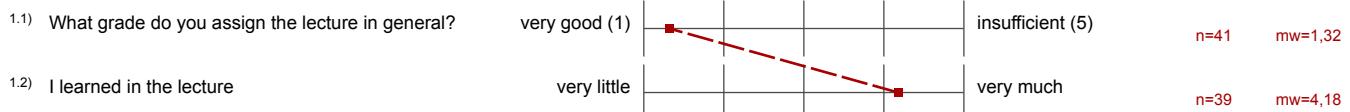

In my opinion it works fine
