1.2) Good/bad support (see question 1.1), because...

- Clear classification of the course materials and clear agenda.
- Good support: Meetings with lecturers.
- Great support in the course, it was very helpful (and essential!) to have the consultations for the presentation.
- I always felt comfortable asking questions if I was unsure.
- I think Dr. Beckmann was always good at answering questions, but I think the support provided on the presentations could have been better.
- The professor always answers questions, clarify misunderstandings, and explain theories, etc.
- The teachers were very dedicated and open to questions.

2. Interactivity and Study Progress Self-Review
2.1) The level of interactivity is appropriate for the concept of the course

3.2) In this course, different media (web conference tools, audio files, videos) is used to present the subject matter in a suitable way

3.3) The concept of the course (presence/virtual/hybrid) is adequate for the current situation

3.4) Please explain your statement regarding the concept and the technical implementation:
- Since I can't go to Germany during the summer semester, I think this seminar can give me the chance to attend the class weekly like we do in the real world.
- motivate the students to try different interactions within the presentations

6.5) What do you particularly like about the course?

- Each reading can give me a new perspective towards the organizations, since I don't really know the organizational structure, e.g. how it functions, before the class. Besides, I think the theory can also applies to our daily life, help us know organization better and to organize our life better.
- I like the fact that our lecturers are very easy going and polite.
- I liked linking the theory to practical examples and being able to dissect the theory/readings. It brings a lot more than just assigning readings and expecting everyone to understand it right away.
- I really like how Dr. Beckmann explains the theory, however, some of the material is simply harder to understand so more time is needed for it.
- Interactive
- Interesting topics discussed and I really liked the presentation of the papers
- Professor Beckmann puts much effort in making a good informative course. Something not much professors do at FAU. Always a pleasure to go to the course.
- Teachers are the best
- The idea to link theories to real life examples
- The interactive aspect of the course. The lecturers

6.6) What are your suggestions for improvement? What could be implemented from other lectures?

- I didn't think the volume was justified with the 5 credits. It was a lot of fun, but some of the texts are very complex and to prepare them weekly. Also, I think it's a pity that the texts have different level, some were much harder, which is why the presentation preparation is much more time-consuming. I would recommend to choose text on the same level to create a fair situation.
- It can be very difficult with the presentation if your partner for your part is inactive, but I'm not sure how this could best be solved.
- More time to work through the material. Sometimes I feel like I can't breath during the lesson because the pace is so damn high.
- No improvement
- Since I think students can not present as good as prof does, and after each class, we can't have the slides from the student. It would be better if we can get a summary from each paper.
- Some of the papers are difficult to understand.
- The course speed was too high.
